

THE GRIDLINE INTERSECTION METHOD

1. Randomly disperse cleared and stained roots in dish with grid lines

3. Follow all **horizontal** and **vertical** lines. Count intersects with roots and mycorrhizas separately

Vertical 2 / 2 2 / 4 1 / 2 0 / 3 3 / 4 0 / 1 1 / 2

Total = 30/60 = 50%
root length colonised
